Hello all FBB software users,

A mistake was done in the 5.12 distribution. The example of EPURMESS.INI file is not correct, as the Binary Mail directory is missing. Please correct this.

```
# definition des parametres de l'epuration des messages.
#
# Directory fichiers messages
\MAIL\
#
# Directory fichiers messages binaires
\BINMAIL\                                <-- Line missing
#                                         =====
# Directory archive messages
\OLDMAIL\
```

The file is well discribed in the documentation.

I apologize for doing this mistake. Best 73 from Jean-Paul, F6FBB.

I have upload on tomcat (bbs/f6fbb/tpk_163.zip) and on nic.funet.fi a terminal packet program from fc1ebn. This program when uses with a f6fbb BBS allows recovery from a crash during a yapp transfert.
